PROFILE

Software Engineering student and full-stack developer with hands-on experience building production-ready web applications using Django, Node.js, React and React Native. Experienced in RESTful API development, AI-assisted systems and database driven platforms. Passionate about solving real-world problems.

TECHNICAL SKILLS

Languages:
Python, JavaScript, Java, HTML, CSS

Frameworks & Libraries:
Django, Django REST Framework, Node.js, Express.js, React, React native

Databases:
SQLite, MySQL, Firebase, PostgreSQL

Tools & Platforms:
Git, GitHub, Docker

Domain:
Full-Stack Web Development

PROJECT EXPERIENCE

1.) Full Stack Ecommerce Platform with AI Integration

Tech: Django | React | TypeScript | PostgreSQL | Google Gemini API

- Developed complete online store with user authentication, shopping cart and payment processing

- Integrated Google Gemini AI to generate dynamic product descriptions automatically

- Built responsive React frontend with TypeScript and Django REST API backend

- Implemented JWT authentication, PostgreSQL database and admin dashboard

- Containerized with Docker for deployment consistency

2.) Meet the Doctor Online (AI Doctor & Booking Platform) { https://mtd-zufy.onrender.com }

Tech Stack: Django, Django REST Framework, Python

Developed an online healthcare platform that allows users to interact with an AI-powered doctor for preliminary health guidance and book consultation sessions with medical professionals. Designed and implemented backend APIs for session management, user authentication, and appointment scheduling.

Impact:
Improves access to healthcare services by providing virtual medical assistance and streamlined doctor booking.

3.) U-Finder Location - Based Marketplace | Full-Stack Developer

Tech Stack: Node.js, Express, React, JavaScript

Built a marketplace platform that enables users to search for products, identify the nearest sellers based on location, and purchase items efficiently. Implemented backend services for product listings, search functionality, and location-based filtering.

Impact:
Connects buyers with nearby sellers, reducing delivery time and improving local commerce.

4.) AI-Powered Exam Marker | Full-Stack Developer

Tech Stack: React, Django REST Framework, Docker, Sentence-Transformers

Impact: Built an AI-powered exam marking platform that evaluates student answers using semantic similarity (Sentence-BERT), providing instant, accurate scores and feedback. Features include role-based dashboards, RESTful APIs, and asynchronous grading workflows—reducing lecturer workload by 80% while enhancing student learning through immediate feedback.

EDUCATION

Bachelor of Science in Software Engineering – University of Zimbabwe *(Ongoing)*
Level: 2

Expected graduation year: 2028

ACHIEVEMENTS & INVOLVEMENT

- Collaborated on real-world AI and full-stack development projects addressing healthcare, agriculture and e-commerce challenges
- Strong experience working with modern web technologies and REST-based architectures
- Actively building practical systems beyond coursework to enhance industry readiness
